

Keynote incl. Free Communication

The sensate breast - Pro nerve coaptation vs. pro nerve conduit

Friday, 4 Sep 2026, 10:30 a.m. - noon, Cube 1

Chair: Stefania Tuinder (MUMC+ Maastricht, IEO Milan), Arash Momeni (Stanford University), Elisabeth Kappos

Autolog Nerve / nerve graft

Speaker: Stefania Tuinder (MUMC+ Maastricht, IEO Milan)

Pro neurotization (heterolog consult)

Speaker: Arash Momeni (Stanford University)

Sensory nerve coaptation in deep inferior epigastric perforator flap breast reconstruction: A double-blind randomized controlled trial

Presentation time: 6 min

Abstract Presenter: H. Smeele (Maastricht University)

Tips and Tricks in Sensate Flaps for Breast Reconstruction

Presentation time: 2 min

Abstract Presenter: P. E. Engels (Geneva University Hospitals)

A Sensate Breast: from Innervated Flaps to Nerve Sparing Mastectomies

Presentation time: 6 min

Abstract Presenter: E. A. Kappos (University Hospital of Basel)

Comparing Nipple–Areola Complex Sensory Outcomes and Nerve-Related Complications by Incision Type in Primary Breast Augmentation: A PRISMA-ScR Scoping Review

Presentation time: 6 min

Abstract Presenter: Y. E. Elshafey (Royal College of Surgeons in Ireland)

Evaluation of resensibilization in flaps containing sensory nerves in the animal model: A systematic review of the literature

Presentation time: 6 min

Abstract Presenter: S. Schulz (HUG Geneva)

Immediate Targeted Nipple–Areolar Complex Reinnervation in NAC-Preserving Mastectomy

Presentation time: 1 min

Abstract Presenter: L. Nichols (HUG Geneva)
