Keynote incl. Free Communication

Autologous fat grafting in breast surgery

Saturday, 5 Sep 2026, 8:30 a.m. - 10 a.m., Cube 1

Chair: Susanna Kauhanen, Clara Schaffer

Fat Grafting: Evidence, Outcomes, and Strategies for Optimizing Volume and Regeneration

Presentation time: 12 min

Speaker: Lukas Prantl

Is there an Ideal Recipient Site Preconditioning to Improve Autologous Fat Graft Retention in Breast Surgery? – A Prospective Multi-Center Randomized Controlled Trial

Presentation time: 8 min

Abstract Presenter: N. E. Speck

Autologous fat grafting and its role in total breast reconstruction

Presentation time: 12 min

Speaker: Susanna Kauhanen

The microbiome in adipose tissue: Why is the infection rate in autologous fat grafting so low?

Presentation time: 8 min

Speaker: Nura Ahmad

Cryopreservation of autologous fat

Presentation time: 8 min

Speaker: Valentina Pinto

Cell-Assisted Lipotransfer in Breast Augmentation Surgery: Clinical Outcomes and Considerations for Future Research

Presentation time: 4 min

Abstract Presenter: D. Asimakopoulos

Radiological findings following hybrid breast reconstruction confirms safety and efficacy of repeated autologous fat grafting

Presentation time: 6 min

Abstract Presenter: E. Limido

Autologous fat transfer to the breast: Complications and surgical guidance

Presentation time: 12 min

Speaker: Marie Jaeger

Discussion

Presentation time: 15 min

Chair: Susanna Kauhanen, Clara Schaffer
