5 — Keynote incl. Free Communication

Imaging and Innovation in lymphatic surgery

Thursday, 3 Sep 2026, 9 a.m. - 10:30 a.m., Deck 5

Chair: Dimitris Dionyssiou, Mario Scaglioni, David Chang

Microsurgical based algorithm for primary lymphedema treatment

Presentation time: 10 min
Discussion time: 2 min

Speaker: Dimitris Dionyssiou

Combined approach to lymphedema surgery

Presentation time: 10 min
Discussion time: 2 min

Speaker: David Chang

The LYMPH Trial: Level I evidence for lymphatic surgery

Presentation time: 10 min
Discussion time: 2 min

Speaker: Elisabeth A. Kappos

A comprehensive algorithm for simultaneous autologous breast and BCR lymphedema reconstruction with a preplanned chimeric DIEP-LNT flap

Presentation time: 10 min
Discussion time: 2 min

Speaker: Efterpi Demiri

Significant Reduction of Acute Complications Following Lymph Node Dissection in Stage III Melanoma Patients through Immediate Lymphatic Reconstruction

Presentation time: 4 min
Discussion time: 2 min

Abstract Presenter: C. Zurfluh

Normative Benchmark Values for the LYMPH-ICF Upper and Lower Limb Modules: A Population-Based Reference Study

Presentation time: 4 min
Discussion time: 2 min

Abstract Presenter: A. Fabi

Lymphatic Mapping and Preservation in Lower Limb Surgery

Presentation time: 4 min
Discussion time: 2 min

Abstract Presenter: G. Boyadzhieva

The influence of sex, age and body mass index (BMI) on outcomes after lymphovenous anastomosis (LVA) and vascularized lymph node transfer (VLNT)

Presentation time: 4 min
Discussion time: 2 min

Abstract Presenter: Julia Stoffel

Systemic effects and contralateral limb size reductions after lymphovenous anastomosis (LVA) and vascularized lymph node transfer (VLNT)

Presentation time: 4 min
Discussion time: 2 min

Abstract Presenter: V. Werdecker
